The scope of work of the Ohio Teacher Evaluation Writing Team during 2009-2011 included extensive study of model evaluation systems throughout the country. Ces 5.1 Crew Evaluation System.rarl A: I agree with @Dror. As in the question, I am posting this answer before @Dror posted his correct answer. I think the best way to answer your question is to use the resources found on the following link: Q1: How do I calculate the number of crew members for a sailboat? a) a sailboat with 5 crew members, maximum of 8 persons, should have: 2 mainsail booms and 2 main sheets, 2 clewlines, 1 reefing line, 1 halyard, 1 halyard pull, 1 halyard block and 1 halyard vang. A1: Calculating crew members on a sailboat How do I calculate the number of crew members for a sailboat? In order to calculate the number of crew members, follow these steps: Ask the crew member about the number of crew members and number of crew members who are not required during the sailing session. Do not ask the number of crew members who sail as part of the official crew (i.e. the main 2d92ce491b
