```
func sum(nums: Int...) -> Int {
    var sum = nums[0]
    for i in 1..Int {
        return nums.reduce(0, combine: +)
    }
}
```

If you wish to do chainable

```
func sum(nums: [Int]) -> Int {
    return reduce(0, combine: +) { a, b in
        return a + b
    }
}
```

But if you want to use closure

```
func sum(nums: [Int]) -> Int {
    var sum = 0
    return reduce(0, combine: { (a, b) in
        return a + b
    }) { a, b in
        sum += b
    }
}
```

The key element in Swift style

---

closures is as... in... statement. For more information on that check out Apple's Swift Closures Programming Guide. Has anyone tried PTQ so far? What do you guys think? Is it worth the money to play a PTQ for 100 new cards? So far I have ordered cards from PTQ because I wanted to be more consistent with my deck building. I am in GP8-G1 with Swamps/Burn and have played a few PTQs before. I would say that I have gotten a higher finish rate in PTQs than I have with OCG decks (I usually finish my PTQs in the top 50). I think as long as you are not a competition league player, PTQs are a good opportunity to improve your deck. I
