Q: Multiple-choice quiz C++ Is it possible to display multiple choice in a quiz in C++? And do I need to change my approach to a multiple choice quiz? The last time I tried to do a multiple choice quiz, it was not multiple choice, it was 2 questions with 1 of 2 possible answers. Here is an example of my current code: #include #include #include using namespace std; int main() { vector my_vector; for (int i = 0; i > my_vector[i]; } int correct_answer; for (int i = 0; i > correct_answer; cout 2d92ce491b
