Q: Using IPAddress.HostToNetworkOrder in .net 4.5 I've got a bit of code that makes use of IPAddress.HostToNetworkOrder() and I have a simple test program using .net 4.5 that compiles but in the debugger I get a compile error: Error CS1526 'int' does not contain a definition for 'HostToNetworkOrder' and no extension method 'HostToNetworkOrder' accepting a first argument of type 'int' could be found (are you missing a using directive or an assembly reference?) I have already searched around to find out what I am missing here and cannot find any references. Is there a suitable replacement for this function? Thanks! A: I would suggest checking the following link to see if there is a replacement for the function. I don't think there is any replacement that does the same thing.
