Vengeance Dance Explotion Vol. 2 is back and bigger than ever! The 1.8GB of data includes more than 1500 outstanding guitar wav files, along with 43 new wav files" Category:2010 albumsQ: Azure S3 select all folders but one I have an Azure S3 bucket with many folders. Is it possible to get list of all folders except one? It is the same as folders except one. A: Get list of all folders and filter the list for specific folder: ls s3://my\_bucket/folder1/ | grep -v folder2 A: Assuming you have a list of folders delimited by a pipe: ls | grep folder2 Will print all folders that aren't folder2 Q: How to access a column in another class So I'm trying to write this in C#, and I'm just not entirely sure how to do it properly. For example, I have a class called EditUser, and in this class I have a list of User objects. The List has a column of "PreferredNames" and it's a type string. What I'm trying to do is access that column in a different class called ViewUser, and I don't really know how to do it. My basic code is as follows: namespace UiPrefs { using System; using System.Collections.Generic; using System.Linq; using System.Text; using System.Threading.Tasks; using System.Collections;
