What's New in the Slide Linker?

Slide Linker is a reliable and useful PowerPoint addin that helps you to quickly duplicate the selected PPT slideshows. By using Slide Linker you have the possibility to select the slides and the objects from the current slides, link the selected slides in order to create a linked group, then duplicate them. Key features of Slide Linker: Select and copy slide or any object from current slide; Link the copied slides in order to create a linked group, then duplicate the linked slides; Using the Create drop down menu, you can link several slides at once. Change the background, layout, color of the selected objects by using the Format buttons in the Slide Linker addin. Include or exclude text, image, shapes, frames and animations in the copied slides by using the Edit/Settings button. The duplicate slideshow consists of two slides: The first is the original slide. The second slide is linked to the first slide. Start working and the users will see the slideshow with the original slide. Select the slide in the original slideshow then you can start changing the slides or objects from the first slide. When you finish, press the Copy button to link the slides and duplicate the slideshow. Sometimes, you may need to change the background color of the second slide, however, the background of the first slide still remains the same. Simply, change the background color of the slide with the color you want and you'll see the color changed in the second slide as well. To change the background of the second slide, right click the first slide and choose the desired color. The duplicated slideshow consists of two slides: The first slide is the original slide. The second slide is linked to the first slide. Start working and the users will see the slideshow with the original slide. Select the slide in the original slideshow then you can start changing the slides or objects from the first slide.
