===== SubGadget is a small plug-in which will connect you to any Subsonic server and display a custom interface, from which you can access and modify the playlists and status of the connected server. To use SubGadget all you have to do is to specify the name of the server to which you want to connect and the password of that server. Next, you can set a custom title, choose your preferred skins and decide what actions should be displayed in the custom interface. Once you've done these things you can click on Start SubGadget. At this point, the default actions of the custom interface will be performed by a small invisible window that will appear in the sidebar and will be always visible. Using the global track and playlist navigation, you can navigate on your connected server. Playlists and the selected artist are shown in the left pane of the custom interface. For further details, please check the documentation. SubGadget is a small plug-in which will connect you to any Subsonic server and display a custom interface, from which you can access and modify the playlists and status of the connected server.
