GIMP GIMP is a completely free, open source image-editing program. Its main advantage is that it has no restrictions on uses. Photographers and print-shop owners can use GIMP to create or alter their images. GIMP has been available since 1996 and has undergone development since its early days to become an extremely powerful program with a user base that has continued to grow. GIMP can do everything Photoshop can and then some, but it can do so at a fraction of the price. In addition, GIMP works in Linux, which makes it accessible even to those who are unable to use Photoshop. GIMP is a powerhouse program, and anyone who has learned Photoshop will find it easy to create or manipulate their images. GIMP is a highly recommended alternative to Photoshop or any other photo-editing program.

Q: Verifying a password using the hashed password in OpenLDAP I am using OpenLDAP for authentication in my system. I am using SHA512 algorithm for hashing passwords. I want to verify the password in the LDAP. I have used the following syntax to verify the passwords: //Change the password PasswordMgr.ChangeUserPassword(user,"*"); //Check the new password UserPrincipalTest test = new UserPrincipalTest(); checkPassword: string->System.Windows.Forms.Password() checkPassword(pwd: string, errorMessage: string) UserPrincipalTest() class has the following function. public bool CheckPassword(string user, string pwd, string errorMessage) { string result = "LdapBindResult.Error=" + errorMessage; string principal = "O=My Organization,OU=groupMembers,OU=users,DC=Company,DC=com"; var context = new PrincipalContext(ContextType.Domain, "Company.com", "DC=Company,DC=com", ContextOptions.SecureSocketLayer); UserPrincipal u = UserPrincipal.FindByIdentity(context, new System.Security.Principal.WindowsIdentity(context)); if (u == null) return false; var hash = new byte[0]; using (MD5CryptoServiceProvider md5 = new MD5CryptoServiceProvider()) { u.VerifyPassword(md5.ComputeHash(u.PasswordHash), Convert.FromBase64String(p

Toyota Motor Corp.'s second-quarter sales broke a record for the Japanese automaker and helped propel its stock price to an all-time high. What remains unclear is whether this is a one-time spike, or the beginning of a long-term shift. In many ways, the robust sales figures are a reflection of the renaissance in which the auto industry finds itself. After years of steady decline, auto sales recently have been on a tear. Last year's 30 million vehicles sold marked a 16-year high, according to the Energy Information Administration. Cautiously optimistic Toyota's sales in the quarter reached $24.8 billion, or 2.2 percent more than a year ago. Toyota Motor Co. chief financial officer and acting group president Tsuyoshi Inoue said in a release that "the company has generated very strong demand for vehicles, with enhanced dynamic performance and value." He went on to say, "Toyota has clearly demonstrated its capability and strength as a global auto manufacturer." In the first half of this year, Toyota announced sales of 486,360 vehicles, a one-year record for Toyota, marking the eighth time in a row the company has sold more than 400,000 vehicles. When investors and observers reflect on the second-quarter numbers, they might remember the 100-plus jump in Toyota sales from the first three months. Because the first half of this year marks just the third time in nearly two decades that Toyota has had more than a one-year rise, it
